</table>

Provide a basic description of goods/services to be provided:
Provide 1500 kW 1875 kVA emergency generator with enclosure.

Intended use of/reason for purchase:
UNMH is replacing one of its emergency power generators, due to its age.

II. BASIS FOR IDENTIFYING VENDOR AS SOLE SOURCE PROCUREMENT. Choose Applicable Box(es) and Provide Detailed Information:

- [x] PROPRIETARY. Item, technology, or service is proprietary and available ONLY from the proposed vendor.

UNM Hospital is replacing one existing Caterpillar emergency generator—we currently have five Caterpillar emergency power generators. The compatibility of the new generator with the existing parallel switch gear and transfer switches is very important to maintain. The equipment pad mounting and connection points would vary if we are forced to use another brand. There would be significant increase of fabrication and installation cost to use any other brand of generator or vendor.

- [ ] COMPATIBLE. Desired purchase must be compatible with existing item, technology or service.

UNMH has services contracts with Wagner Power Systems and receives excellent service from them. UNMH Facilities Department recommends that emergency power is too mission critical to experiment with using a mismatched generator.
RENEWAL. Support, maintenance, software subscription, technology or other intellectual property must be renewed ONLY from proposed vendor.

The compatibility of the new generator with the existing parallel switch gear and transfer switches is very important to maintain.

OTHER. Other basis for Sole Source not described above.

This Sole Source request is a modification to a previously approved Sole Source (dated 10/2/17) approved sole source for the purchase of Generator #3 for this project. This Sole Source request is to provide replacement generator for Generator #2.

III. SUPPLEMENTAL DETAILS. Please Provide Additional Information As Requested Below:

Describe the unique capabilities of the proposed vendor's goods, services, or personnel performing the work and substantial risks that could not be overcome without purchase.

The compatibility of the new generator with the existing parallel switch gear and transfer switches is very important to maintain.

Identify other vendors or sources and the reason they were found to be unsatisfactory for providing the goods, services, or personnel performing the work.

There would be significant increase of fabrication and installation cost to use any other brand of generator or vendor.

IV. DEPARTMENT APPROVAL.

By signing below, the department certifies that the information submitted on this form has been reviewed and this purchase has departmental approval. The final determination of Sole Source approval shall be made by the Purchasing Department.
